GALIH EKA PUTRA

Global Technical Support Manager · Customer Success Leader · IT Security & AI Identity Platforms

📍 Bogor, West Java, Indonesia | 📞 +62 878 8007 0666 | ✉️ Galih.ekaputra@live.com | 🔗 linkedin.com/in/galih-eka-putra

EXECUTIVE PROFILE

Senior technology executive with 13+ years of progressive leadership across enterprise IT support, customer success, and cybersecurity — spanning global AI fintech, e-commerce, digital payments, and enterprise software. Currently serving as Global Technical Support Manager at ADVANCE.AI, a leading AI-powered identity verification company, where he oversees 24/7 post-sales technical operations for eKYC, biometric authentication, anti-fraud, and AML platforms deployed at major banks and fintech institutions across APAC.

Recognised for transforming high-complexity, high-stakes technical support functions into strategic business assets — consistently improving SLA performance, reducing resolution times, and converting support operations into retention and revenue levers. Combines hands-on engineering depth (ATM security, cloud infrastructure, API architecture, compliance frameworks) with executive-level stakeholder management and cross-functional leadership.

Certified in ISO 27001/27701, PCI DSS, NSICCS, NIST, CCSM Level 2, and multiple cloud and cybersecurity frameworks. Public speaker on AI's impact on workforce and tech careers. Recipient of ADVANCE.AI's Pinnacle Award – Professional Role Model 2026.

KEY IMPACT METRICS

99.7% SLA Adherence Achieved (up from 92%)	**42%** Reduction in Incident Resolution Time	**$4.5M** Upsell / Cross-Sell Opportunities Driven	**28%** Enterprise Client Retention Increase
120+ High-Severity Incidents Managed Annually	**96%+** CSAT Score Maintained	**52%** Deployment Delay Reduction	**20M+** Annual Transactions Supported at Scale

CORE COMPETENCIES

Global Technical Support Operations	AI/eKYC & Biometric Platform Management	IT Security & Compliance Leadership
Customer Success & Retention Strategy	High-Severity Incident & Escalation Management	ISO 27001 / PCI DSS / NIST / NSICCS Governance
SLA Design & Service Excellence Frameworks	Cross-functional Product & Engineering Collaboration	Cloud Infrastructure (Alibaba, Azure, Kubernetes)
Enterprise Account Management	Team Building & Multicultural	Digital Transformation & AI Workforce

(Banking / Fintech)	Leadership	Strategy

PROFESSIONAL EXPERIENCE

Global Technical Support Manager

Sep 2020 – Present (5+ years)

ADVANCE.AI · Indonesia · APAC-wide

ADVANCE.AI is a Singapore-headquartered AI company specialising in digital identity, fraud prevention, and risk management for the financial services industry. Its flagship products — eKYC, face recognition, liveness detection, AML screening, and anti-fraud systems — serve tier-1 banks, digital lenders, and fintech operators across Southeast Asia and beyond. As Global Technical Support Manager, Galih leads the entire post-sales technical operations function, managing a distributed team of engineers and Customer Success Managers (CSMs) responsible for 24/7 SaaS and on-premises support at mission-critical availability levels.

▸ Service Delivery & SLA Performance

- Redesigned end-to-end SLA framework for AI identity verification platforms, elevating SLA adherence from 92% to 99.7% — a transformation achieved through process standardisation, automated monitoring pipelines, and the introduction of tiered escalation protocols aligned to client criticality.
- Reduced average incident Mean Time to Resolution (MTTR) by 42% — from 12 hours to 7 hours — by re-engineering the triage workflow, establishing L1/L2/L3 ownership boundaries, and building a centralised knowledge base to accelerate diagnosis of recurring failure patterns.
- Established global partner and field engineer coordination framework, ensuring timely execution of 200+ service orders annually and reducing deployment delays by 52% through pre-deployment checklists and proactive scheduling.

▸ Customer Success & Revenue Impact

- Drove $4.5M in upsell and cross-sell opportunities by embedding customer success principles into technical support touchpoints — identifying product expansion signals during incident reviews, QBRs, and health check engagements.
- Increased enterprise client retention rate by 28% through structured success planning, proactive health monitoring, and aligning technical support strategy with each client's compliance, fraud risk, and business growth objectives.
- Reduced client time-to-value by 38% by redesigning the post-sales onboarding journey, introducing outcome-based milestones, technical readiness assessments, and dedicated hypercare windows during go-live phases.
- Lowered churn risk for top-tier accounts by 21% through early-warning detection models, escalation playbooks, and executive-level relationship cadences maintained with C-suite stakeholders at key banking clients.

▸ Escalation & Critical Incident Management

- Served as global escalation leader for all P1 and P2 incidents, successfully managing 120+ high-severity situations annually — including liveness bypass attempts, biometric mismatch spikes, false positive surges, and AML system outages — while maintaining CSAT scores above 96%.
- Built and institutionalised a Critical Incident Management (CIM) playbook covering detection, triage, war-room coordination, client communication, root cause analysis (RCA), and post-incident review — now the operational standard across all APAC deployments.

▸ Technology & Scale

- Co-developed technology and operational roadmaps with executive leadership that scaled the support function to handle 20M+ annual transactions, supporting onboarding spikes of 500,000+ new users per month without degradation in service quality or SLA performance.
- Partnered with Product and AI Engineering teams to create a structured feedback loop from support incident data into the product development cycle, resulting in a 33% reduction in customer-reported defects and an 18-point improvement in onboarding Net Promoter Score (NPS).

▸ Governance & Compliance

- Led IT governance maturity initiatives that brought the organisation to ISO 27001 certification readiness, ensuring full alignment with NIST Cybersecurity Framework, PCI DSS, ISO 27701 (Privacy Information Management), and regional data privacy regulations governing identity systems.
- Oversaw security compliance for all client-facing AI identity systems, including regular audit support, regulatory review participation, and enterprise-level technical due diligence for new financial institution onboarding.

Business Security Manager

Jun 2020 – Aug 2020

Bukalapak · Jakarta, Indonesia

Bukalapak is one of Indonesia's largest e-commerce platforms, serving millions of SMEs and consumers. Brought in to assess and mitigate business unit-level technology security risks during a critical period of platform scaling.

- Conducted comprehensive technology and business security risk assessments across multiple business units, identifying exposure areas and proposing prioritised, commercially viable mitigation strategies.
- Acted as the primary liaison between business units and the centralised Information Security division — translating technical security requirements into business-understandable guidance and facilitating rapid resolution of security findings.
- Spearheaded security awareness programmes and embedded secure coding standards within engineering teams, contributing to a measurable improvement in vulnerability discovery rates during pre-deployment reviews.

Head of Technical Support

Jan 2020 – May 2020

DANA Indonesia · Indonesia

DANA is Indonesia's leading digital wallet and payment infrastructure provider, processing millions of daily transactions across consumer, merchant, and B2B channels.

- Took ownership of all key account technical inquiries, ensuring high-quality service delivery across the payment network and maintaining SLA commitments for enterprise merchant and financial institution partners.
- Conducted structured analysis of merchant and partner pain points — synthesising recurring issues into actionable product improvement proposals submitted to the e-wallet engineering and product teams.
- Coordinated cross-functional incident resolution, working with internal engineering, operations, and compliance teams to resolve issues rapidly and maintain stakeholder satisfaction across a high-transaction-volume payment environment.

Technical Account Manager

Mar 2018 – Dec 2019

DANA Indonesia · Indonesia

- Managed end-to-end technical account relationships with key enterprise partners and payment network clients, ensuring SLA adherence, proactive communication, and long-term satisfaction.
- Developed and maintained deep technical knowledge of DANA's platform capabilities to serve as a trusted advisor — bridging client requirements with internal product and engineering capabilities.
- Led account reviews, managed escalations, and tracked open items to closure, consistently delivering a positive and responsive support experience for strategic accounts.

Chief Operations Officer

Jan 2018 – Dec 2018

Star Share · Semarang, Central Java, Indonesia

- Designed and implemented end-to-end business operations framework, establishing operational policies, reporting structures, and KPI systems that aligned day-to-day execution with company strategic objectives.
- Oversaw cross-functional executive teams, ensuring cohesive delivery across product, sales, and operations functions during a period of business establishment and early growth.

Technical Account Support

Oct 2015 – Mar 2018

Microsoft · Indonesia

Premier Support division serving Microsoft's highest-value enterprise customers — predominantly Financial Services, Banking, and Oil & Gas clients in Indonesia.

- Designated Indonesia Cybersecurity Champion — developed and executed an initiative to convert customer security feedback into structured, actionable product and service improvement data, directly improving satisfaction levels and security posture for premier enterprise accounts.
- Served as on-site and remote critical situation manager for premier banking and oil & gas clients, leading real-time incident response, coordinating Microsoft engineering resources, and maintaining stakeholder trust during high-severity outages.
- Provided trusted advisory services on IT infrastructure optimisation, Windows Server/Azure architecture, Microsoft System Center deployments, and enterprise security compliance for Fortune-class Indonesian enterprises.
- Recognised with the Social Selling Champion Award and Cyber Security Champion Award by Microsoft Indonesia (2017).

Software Consultant – Banking Division

Nov 2013 – Oct 2015

Diebold Nixdorf (formerly Wincor Nixdorf) · Jakarta, Indonesia

Global leader in ATM hardware and software solutions. Delivered professional services to Indonesian banking institutions, specialising in ATM software development, terminal security, and payment standard compliance.

- Delivered end-to-end software consulting for ATM banking platforms, including requirement analysis, change impact assessments, unit and system integration testing, UAT facilitation, performance tuning, and production monitoring.
- Developed ATM application modules using NDC and DDC protocols, deployed across Indonesia, Singapore, Malaysia, Thailand, and the Philippines — one of the few engineers in the region certified across all five markets.
- Served as certified Terminal Security Engineer (TS IP/AP/HDE), conducting security validation and penetration testing for ATM hardware and software at Indonesian banking institutions.
- Acted as certified compliance tester for both NSICCS (National Standard for Indonesian Chip Card Specification) and PCI DSS (Payment Card Industry Data Security Standard), ensuring payment infrastructure readiness for national regulatory requirements.
- Recognised with the Extra Miles Award (2014) for outstanding contribution to project delivery and client satisfaction.

System Implementer

Dec 2012 – Oct 2013

PT Fortius Solusi Informatika · Indonesia

- Implemented Teradata enterprise data warehouse and Microsoft SharePoint solutions for major Indonesian banking institutions, covering deployment, configuration, integration, and user acceptance testing.
- Supported pre-sales teams by developing live demos and prototype solutions for enterprise banking reconciliation use cases (Nostro/Vostro accounts), contributing to successful deal closures.

Lab & Lecturer Assistant – Information Security

2010 – 2012

Trisakti University · Jakarta, Indonesia

- Delivered undergraduate instruction in information security fundamentals, cryptography, and encryption systems — building the technical foundation that underpins a career in cybersecurity and compliance.

SPEAKING ENGAGEMENTS

Featured Speaker – AI & the Future of Work: Navigating Tech Careers in an AI-Augmented World

January 2026

TechTalk30 – Online Community Webinar Series · Indonesia

- Delivered a practitioner-led session on how AI is reshaping technical roles, workforce dynamics, and career trajectories — drawing from direct experience leading AI-powered identity verification operations for enterprise financial clients across APAC.
- Addressed how professionals and managers can proactively upskill, reframe their value, and lead AI adoption within their teams, rather than being displaced by it — offering concrete strategies grounded in real-world operational transformation.
- Engaged a community of technology professionals, career changers, and students; session positioned within the broader #TechCareer2026 initiative promoting career resilience in the face of AI disruption.

EDUCATION

Bachelor of Science – Computer Software Engineering
2008 – 2012

Trisakti University · Jakarta, Indonesia · Full Academic Scholarship

🏆 *Graduated as Best Student – Informatics Engineering Study Program (Class of 2012)*

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Customer Success & Service Management

- Certified Customer Success Manager (CCSM) Level 2 – SuccessHACKER
- IT Service Desk: Service Management – LinkedIn Learning
- Customer Success Management Fundamentals – LinkedIn Learning
- Presenting to Senior Executives – LinkedIn Learning
- Ant Financial Expert for Technical Operations – Ant Group / Alipay

Project & Program Management

- Project Management Essentials Certified (PMEC) – Management and Strategy Institute
- Scrum Foundation Professional Certificate (SFPC) – CertiProf
- Microsoft Certified Technology Specialist: MS Project 2010, Managing Projects – Microsoft
- Microsoft INSEAD Online Business Strategy & Financial Acumen – INSEAD Executive Education
- Critical Thinking for Better Judgment and Decision-Making – LinkedIn Learning

Cybersecurity & Compliance

- ISO 27001:2022 & ISO 27701:2019 Internal Auditor
- CNSS Certified Network Security Specialist – ICSI (International Cyber Security Institute), UK
- Certified Secure Computer User (C/SCU) – EC-Council
- API Security Architect – API Academy
- API Product Manager & API Designer – API Academy
- Cyber Security Certification – TheDigitalAdda
- Terminal Security Engineer (TS IP/AP/HDE) – Diebold Nixdorf International GmbH
- Cloud Platform University: Operations Management & Security – Microsoft
- Cloud Platform University: Selling Security & Compliance – Microsoft
- Anti-DDoS Basic & Pro – Alibaba Cloud
- ACA Cloud Security Certification – Alibaba Cloud
- Autopsy Basics & Hands On (Digital Forensics) – Basis Technology

Cloud, Data & Emerging Technology

- ACA Cloud Computing Certification – Alibaba Group
- ACA Big Data Certification – Alibaba Cloud
- Cloud Security Specialist – Alibaba Cloud
- Using Kubernetes to Manage Containers & Cluster Resources – Alibaba Cloud

- CI/CD with Jenkins – Alibaba Cloud
- Elements of AI – University of Helsinki
- Verified Certificate: Sustainable / Designing / Building Financial Services on Web 3.0 – National University of Singapore (3 certificates)
- Introduction to DevOps – Alibaba Cloud
- Big Compute: Hyper-Scale Solutions in Azure – Microsoft Cloud Platform University

TECHNICAL SKILLS & TOOLS

Support & CRM Platforms: Zendesk · Jira · HubSpot · ChurnZero · Freshdesk

Monitoring & Observability: Kibana · Grafana · ELK Stack · Proactive Alerting Pipelines

Cloud Platforms: Alibaba Cloud · Microsoft Azure · Hyper-V · Kubernetes · CI/CD (Jenkins)

Data & Warehousing: Teradata · Alibaba MaxCompute · SQL · Big Data Fundamentals

IT Infrastructure: Microsoft System Center (SCCM, SCOM, SCSM, SCVMM, MDM) · SharePoint · Windows Server 2008+

Compliance Frameworks: ISO 27001 · ISO 27701 · ISO 22313 (BCP) · ISO 29151 (PII) · PCI DSS · NSICCS · NIST CSF

Development & Protocols: ATM NDC/DDC Protocol Development · API Design & Security · REST APIs

Languages: Indonesian (Native) · English (Full Professional Proficiency)

HONORS & AWARDS

Pinnacle Award – Professional Role Model 2026	ADVANCE.AI	2026
Social Media Award	ADVANCE.AI	2021
Social Selling Champion Award	Microsoft Indonesia	2017
Cyber Security Champion Award	Microsoft Indonesia	2017
Extra Miles Award	Diebold Nixdorf Indonesia	2014
Best Graduate – Informatics Engineering Study Program	Trisakti University	2012
